PETITION TO THE UK GOVERNMENT
Title: Call on the UK Government to give Asylum Seekers the chance to work

Description: People who are awaiting the outcome of an asylum decision, or those whose application has failed but are unable to return home, should be given the chance to work so that they can support themselves. Asylum seekers are often forced to rely on state support with the denial of lawful means to support themselves and are exposed to potential destitution. Affording asylum seekers the right to work would allow them to be self-reliant, avoid destitution and to retain their dignity during their first experiences of life in this country.
